Uvod

Korišćene tehnologije:

- Bootstrap
- JavaScript
- jQuery
- HTML
- CSS
- Plugin Noty

Okruženje:

- Visual Studio Code

Funkcionalnosti:

- Ručno kucan sajt, bez dodatne upotrebe template-a
- Responsive dizajn
- Dinamičko ispisivanje sadržaja
- jQuery animacije
- Dinamičko filtriranje knjiga po kategoriji
- Korpa za kupovinu
- Forma za kupovinu i kontakt sa validacijom i objašnjenim greškama

Opis funkcionalnosti

Carousel je napravljen u JavaScriptu i koristi različite slike za male i velike uređaje. Prvo se inicijalizuje, pa se generišu tačke i onda se učitava tajmer za promenu slike. Pritiskom na tačke ili na strelice se može promeniti slika. Koriste se animacije fade-in i fade-out za promene slika. Ne može se promeniti slika dok se animacija ne završi.

Glavni sadržaj na stranici su knjige koje su napravljene preko klase. Knjige su objekti te klase koji se učitavaju preko ajaxa. Postoji mogućnost filtriranja knjiga po njihovoj kategoriji i korišćene su animacije fade-in i fadeout za prelaz između kategorija. Klikom na sliku knjige ili njihov naziv otvara se modal sa detaljnijim opisom knjige koji takodje koristi animacije fade-in i fade-out. Omogućeno je izlaženje iz modala klikom van njegovog prozora.

Dodavanjem u korpu izlazi notifikacija, a pokušajem dodavanja iste knjige više puta izbacuje potvrdu sa upozorenjem da je knjiga već u korpi.

Korpa u navigacionom meniju se dinamički osvežava, daje mogućnost povećanja ili smanjivanja količine artikla preko dugmića '+' i '-' i dugme za uklanjanje artikla iz korpe. Cena se automatski osvežava u zavisnosti od količine artikla. Artikli dodati u korpi imaju njihov ID sačuvan u localStorage-u, iz koje se on uzima koristeći jQuery da bi se učitao objekat knjige u korpi. Ako se na stranici korpe otvori i korpa u navigacionom meniju, tada dodavanjem artikla na jednom mestu dodaje taj isti i na drugom u isto vreme.

Stranica korpa sadrži tabelu sa svim artiklima, njihovim cenama u odnosu na njihovu količinu i ukupnu cenu svih artikla. Takodje ima opciju povećanja/smanjenja broja artikla i dugme za uklanjanje istih. Za manje uređaje tabela je zamenjena dizajnom više prikladnim za takve uređaje.

Stranica za kupovinu sadrži formu sa validacijom i prikazuje greške za njihov unos ukoliko se dese. Ako se za državu izabere 'ostalo', pojavljuje se novo polje u koje korisnik može da unese svoju državu. Kada se pritisne dugme kupi, korpa se isprazni i korisniku izlazi poruka o uspešnoj kupovini. Dugme poništi unose resetuje celu formu. Ukoliko je korisnik pritisnuo dugme kupi pre nego što je popunio formu tada ce se greška pokazati na svakom elementu.

Stranica Prodajna mesta sadrži formu za kontakt sa validacijom i prikazom grešaka prilikom unosa. Dugmetom pošalji izlazi notifikacija za uspešno poslatu poruku. Ukoliko je korisnik pritisnuo dugme pošalji pre nego što je popunio formu tada ce se greška pokazati na svakom elementu. Takodje stranica sadrži i google map lokaciju.

Stranica O nama sadrži informacije o autoru i link ka protfoliu.

U futeru su linkovi ka socijalnim medijama kao i link ka dokumentaciji.
